Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Meuwly et al., U.S. patent # 5,185,445. Meuwly discloses silane group-functionalized triazine compounds wherein the variable “p” is zero that may be employed as a UV absorber in coating compositions of the pigmented and unpigmented variety (column 12, lines 1-9).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Leppard et al., U.S. patent # 5,364,749. See the front page and Table 1.

Allowable Subject Matter

Claims 2-6, 8-10, and 13-15 are allowed. The Examiner was unable to find a reference that described the preparation of a silane group-functionalized triazine wherein the preparative method entailed coupling an isocyanate moiety with a hydroxyl group.

Applicant has filed for the Examiner's consideration a search report from a counterpart WIPO application. Of the references cited therein, only the European document even appears to teach a silylated triazine and that compound, though silylated, does not possess the multi-aromatic ring structure required of a UV absorbing triazine.
